EDUCATION

Panjab University

Master of Computer Application

Chandigarh, 160014

Nov. 2020 – May 2023

Dav College Sector 10

Bachelor of Computer Application

Chandigarh, 160010

Aug. 2017 – May 2020

EXPERIENCE

Full Stack Developer

DxBrite Technologies

Aug 2023 – Present

Mohali, Punjab

- Designed and implemented a REST API using .NET Core and SQL Server to manage and store data.
- Developed a full-stack web application leveraging .NET Core, Angular, and SQL Server to deliver seamless user experience and efficient data management.
- Built interactive and responsive user interfaces using Angular, implementing dynamic functionality, form validation, and state management to enhance user engagement.

Internship

DxBrite Technologies Pvt.

Feb. 2023 – Aug 2023

Mohali, Punjab

- Gained hands-on experience with full-stack development, learning and working with .NET Core, Angular, AJAX, and SQL Server.
- Assisted in developing and maintaining web applications, implementing features using Angular for dynamic UIs and .NET Core for server-side logic.
- Collaborated with senior developers on live projects, contributing to coding, debugging, and optimizing application performance.
- Worked with SQL Server to design and query databases, improving application data handling and user experience.

PROJECTS

MedicalClinic | C#, .Net, Angular, SQL

August 2024 – Present

- Developed a comprehensive healthcare platform allowing clinics and doctors to register, create profiles, and manage appointment schedules, using Angular and .NET Core.
- Implemented features for clinics and doctors to list services, specialties, and available time slots, enabling patients to easily book appointments based on their preferred time and specialist.
- Integrated secure authentication for both clinics and doctors, along with a Stripe-powered payment processing system for handling platform fees and patient transactions.
- Optimized the platform for mobile responsiveness, ensuring accessibility for users on all devices, enhancing patient outreach and doctor availability across different regions.
- Integrated Agora for video consultations, allowing secure and real-time virtual appointments between doctors and patients.
- Implemented SignalR for real-time messaging, enabling instant communication between patients, doctors, and clinic staff for better appointment coordination and support.

MedicalEDirectory | C#, .Net, Angular, SQL

May 2024 – August 2024

- Developed a global healthcare directory platform that connects doctors and patients for remote consultations, using Angular and .NET Core.
- Implemented features for doctors to create profiles, list specialties, allowing patients to easily find the right specialist.
- Integrated secure user authentication for both doctors and Clinic, along with payment processing systems for platform fees using strip.
- Optimized the platform for mobile responsiveness, ensuring accessibility for users on all devices, enhancing patient outreach and doctor availability across different regions.

Projex | C#, .Net, Angular, SQL

Feb 2024 – May 2024

- Developed the web application using Angular and .NET Core, providing a seamless user interface for inputting project details and generating accurate cost estimates.

- Implemented secure user authentication and payment processing systems using stripe.
- Built a comprehensive estimation platform to assist builders and contractors in calculating material requirements and costs for construction projects.
- Implemented features for estimating materials such as fan, wire, and plugs, as well as labor costs and project timelines.

TECHNICAL SKILLS

Languages: C#, SQL, JavaScript, TypeScript, HTML/CSS

Frameworks: Angular, .Net, Material-UI

Developer Tools: Git, VS Code, Visual Studio
